Subject: 9/21/ SC Meeting
Date: 09/14/2006 11:11 AM

I missed the 9/13 PH TCT meeting yesterday, but understood there was discussion about moving the 9/21 SC meeting to the afternoon to avoid a conflict with a T4 Early Action monthly meeting also scheduled for that morning. I'm not exactly sure what was settled on..., so I suggest we keep our SC meeting on for the morning. In these 1st couple of monthly SC meeting, I really don't envision a lot of participation by our technical staff (Rene, Dana, etc)..., I see them participating in later meetings when we talk about individual sites in an in-depth basis. **Do we agree that the SC meeting will be from 9-12 Thurs 9/21 at DEQ's NW Region?**

I also want to suggest the following agenda for the 9/21 SC meeting. This agenda is based on my 8/18 e-mail (summary of 8/18 SC meeting), Kristine's 8/21 e-mail suggesting additional agenda items, & my suggestion to discuss the EPA SC tracking contract.

1) Choosing samples sites (upland sites for Kristine to get involved in to understand DEQ strategy for SC. Start plugging Kristine into these sites so that she can provide input & gain a better understanding & familiarity with DEQ's process)

2) Discuss EPA's comments on 6/06 Milestone Report

3) Further define & begin to discuss "List of Important SC Issues" (EPA see my 8/18/ email for details)

- loading

- EPA's acceptance of SCD & strategy DEQ uses to reach SCDs

- Timeline for SCD

- How does ROD address SC?

4) Discuss integration of upland SC & in-water RI/FS

5) Schedule /Timeline

6) DEQ positions (Jim, Keith, Matt roles in SC)

7) RI/FS data needs from SC

8) EPA's SC tracking contract

That's a real full agenda. **Let me know if you have anything to add or suggest prioritizing the agenda items.**
